Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. An Amendment was filed 6/7/05.
2. Claim 4 is objected to because "housing the crown" should be "housing and the crown".
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Kuo 6767024.

Re **Claims 1-3**, Kuo discloses a cable guide, as depicted in figs 5-6, for control cable B comprising

And extending between actuator 22, and suspension system (unidentified, including elements 51),

the suspension system having a crown (fig 6; unidentified portion connecting tubes 51), connecting two parallel tubes 51 to a steerer tube (unidentified, tube above crown in fig 6),

the guide further comprising

housing, including elements 61, 65, 651, formed directly on an outer surface (fig 6) of the crown, with bore (unidentified in element 651) extending therethrough for the cable,

the suspension system further comprising
spool 61 for winding/unwinding the cable (c2, in 65-66), such that the cable lies substantially in a plane of the spool, and,
the cable including inner wire B (cross-hatched element) encased in an outer casing (unidentified in fig 5; connected to element 651),
the housing having a radially-extending flange (unidentified bottom flange of element 61 on which inner wire rests) for engaging the casing while permitting the inner wire to extend thru the bore.

Re Claim 4, the reference discloses the recited "housing and crown". The language "forged together" is patentably immaterial because it does not further distinguish over the structure provided by Kuo.

4. RESPONSE TO REMARKS

Examiner reiterates her rejections employing Kuo, the reference disclosing the respective recited elements. The language "forged together" is patentably immaterial because it is not distinguished over the structure provided by Kuo.
